

In an attempt to alleviate some of the traffic in the morning, we would like to explore adding a second drop off location for parents. We realize that the amount of car riders will change as the year progresses and more students begin to ride the bus. We will continue to study the traffic and make this a priority for the safety committee.

#### Morning Arrival

All cars should enter the main driveway and proceed slowly in the direction behind the school. If a bus is dropping off students, you are permitted to pass them slowly as they are dropping off curbside.

Once you move around the corner you will have two choices:

**Choice # 1** is to proceed to drop-off location #1. Please pull up to the brown doors so other cars can unload at the same time. **Please DO NOT PASS a car that has students unloading.** If you have small children that need unbuckled, this is the preferred drop-off location. Students should follow the path located on the map in orange. Please note the merge point at the top of the parking lot near the church labeled with a red arrow.

**Choice #2** is to proceed to drop-off location #2. If your children are of the age that they can walk up the steps without your assistance, then you may prefer this option. Please pull half way up the lot to the area indicated with the red stop sign on the map. Students should follow the path located on the map in orange. Please note the merge point at the top of the parking lot near the church labeled with a red

arrow. Once at the top of the steps students will be stopped by a staff member until it is safe to cross the walkway.

I realize that we will have additional challenges once the weather gets colder, but hopefully this will alleviate some of the traffic issues.

I would appreciate any extra help that is available between 8:10-8:30.

Mr. Davis
