eazeigler22@gmail.com

I have been teaching at Saint Bernadette since 2010. I graduated from Carlow University in 2008 with a Bachelor of Science in Elementary Education. At Saint Bernadette I enjoy coaching the Varsity Cheerleading squad, moderating the “24 Club” for grades 3 and 4, and also helping with the Talent Show.

When I am not a SBS, I enjoy spending time with my family and friends and also singing in the Saint Susana Family Choir.

In Third grade we learn about many exciting topics throughout the year. In Math we explore addition, subtraction, telling time, charts/graphs, multiplication/division, measurement, geometry, and fractions/decimals. Third graders also learn long division for the first time.

In Science class we learn all about plants, animals, ecosystems, weather, simple machines, magnetism, and the solar system. We connect Math with Science and enhance each topic with projects and labs to help with understanding. In Social Studies we learn about communities near and far. We learn about rural, suburban, and urban communities as well as communities from long ago and today. Third graders complete a Timeline project that chronicles their lives from birth-grade three. Students also enjoy creating maps and fort projects to help to understand our lessons more fully.
